Supervision

Scope

The policy applies to all residency and fellowship programs at CCHS.

Purpose:

The Sponsoring Institution must maintain an institutional policy regarding supervision of residents/fellows.

Policy and Guidelines

Each program director must ensure, direct, and document adequate supervision of residents/fellows at all times. There must be training program-specific policies and guidelines for resident/fellow supervision and progressive levels of responsibility for each year that are distributed to all residents/fellows and teaching faculty. Such policies will be reviewed/approved by GMEC.

The clinical responsibilities for each resident/fellow must be based on PGY-level, patient safety, resident/fellow education, severity and complexity of patient illness/condition and available support.
